

SERVICE AWARDS

PRESIDENT'S COUNCIL UNIVERSITY SERVICE AWARD

(Award Winner Nominated by the Faculty Senate)

Guido F. Verbeck, IV

Chemistry

Verbeck has been a member of the analytical community for 22 years. Among this design portfolio, Dr. Verbeck has developed the “drug-sniffing car” and online cancer research tools. Dr. Verbeck has had an outstanding service career in the department, college, university, and community. His philosophy on service is as follows: “In academia we can get lost in self-promotion, and sometimes forget that as the university gets better, we do also. At this point, UNT and Guido Verbeck are forever linked, as UNT gets better so does my program, and as my program gets better, so does UNT. And thus, service is warranted.”
