University Distinguished Research Professor

Arup Neogi
Physics

Dr. Arup Neogi is Professor of Physics at UNT's College of Sciences. He joined UNT in 2002 with a dual Ph.D. in Physics as well as in Electrical Engineering. He leads the Photonics program at UNT and is the Principal Investigator of NSF's Emerging Frontiers in Research and Innovation program on Phononics based at UNT. He currently leads a team of UNT faculty members of Physicists, Engineers and Industrial researchers to explore the frontiers of new acoustic science and technology. He has graduated over thirteen doctoral students during his term at UNT. He has established a strong international collaborative research program with partners in China, Italy, Japan, Mexico, Portugal and U.K.
